

# Rêverie Fell Bio

Captivating audiences with their highly energetic shows and stage presence, Rêverie jumped into the Boston rock scene in 2021 boasting a sound harkening back to the arena rock era of the 1980s. Taking inspiration from classic bands such as Journey, Styx, and Bon Jovi, Rêverie showcases these elements in a modern light.

Rêverie is a group of young passionate musicians united by their unwavering dedication to redefining the sound of rock music. With relentless energy and dedication, they aim to set a new standard for the rock experience by igniting hearts and minds through their electrifying live performances. They aim to craft a sonic journey that transcends boundaries and merges the timeless soul of rock with their cutting-edge artistry. They inspire, provoke, and empower audiences by embracing the spirit of rebellion, pushing the limits of creativity, and fearlessly challenging conventions while staying committed to authenticity and fostering a connection where everyone can find solace and exhilaration within their music.

Founded by keys player and vocalist Gilliam Robles and guitarist Christian Mangiameli in 2021 at Berklee College of Music, the pair aimed to bring back the so-loved music from the arena rock era of the 80s. The band then brought on vocalist Alec Demello, who would become the band's lead singer and songwriter, and drummer/producer Víctor Echániz. The band rounded off their lineup with guitarist Jesse Kunkowski, bassist Kevin Kelleher, and backing vocalist Reagan Starrett.
